AtNetPlus, Inc. Launches AtNetMail for BlackBerry

Stow, OH –June 10, 2008 – Leading northeast Ohio information technology firm AtNetPlus, Inc. today announced that they have joined the BlackBerry® Solution Provider Alliance Program. In conjunction with the program the company launched AtNetMail for BlackBerry, which is an ideal solution for small- and medium-sized businesses that need secure, reliable BlackBerry smartphone services with local, national or worldwide access.

AtNetMail for BlackBerry users enjoy individual customization on a hosted BlackBerry Enterprise Server for Microsoft® Exchange. Features such as simplified initial device setup, phone configuration backup, password synchronization between the handset and user applications, and folder synchronization can be tailored to the preferences of the individual user or company policy.

The AtNetMail for BlackBerry service provides convenient, wireless access to most business applications such as: email, Internet, contacts, calendars, and tasks. AtNetPlus can also implement synchronization with other applications including mileage managers, stock tickers, bank transaction tracking, and inventory control applications.

Partner, Jim Laber noted “AtNetMail for BlackBerry provides our customers with wireless accessibility, reliability, and ease-of-use, all of which were important to us as we were deciding on a solution for our clients.” Laber continued, “We are confident that combining the power of the BlackBerry solution with the exceptional flexibility of our service will give our customers a competitive advantage.” “In addition, because the BlackBerry Enterprise Server is located in our state-of-the-art data center we offer a very secure environment for our users,” concluded Laber.

The BlackBerry Solutions Provider Alliance Program is part of a growing list of partnerships and alliances AtNetPlus has undertaken in order to provide clients with the most innovative solutions available.
